FRONTEND DEVELOPER

I am a frontend web developer who has strong interests in exploring web technologies. I am passionate about designing and developing web applications that are scalable, responsive and accessible across different platforms. I possess strong problem solving skills.

WORK EXPERIENCE

Reticon — Frontend Developer(Remote)
NOV 2021 - Present

I am currently developing frontend web applications for clients using several technologies to deliver optimized user interface.

- Use of cross-browser compliant HTML, CSS and JavaScript code to give a consistent look and feel across all web properties.
- Use of best coding practices based on commonly accepted standards to establish site layout and user interface.
- Use of Next JS to deliver optimized and pre-rendered pages when necessary.
- Use of redux and context api to manage client state.
- server state management separate from client state to always provide the latest changes on the server and also caching of api requests to prevent unnecessary loading of pages.

SKILLS

Languages: HTML, CSS, JavaScript, Typescript.

Libraries: React, Next JS, Redux, JQuery, React Query, Styled-Components.

Frameworks: Bootstrap, Tailwind Css, Scss.

Familiar With: Node JS, Express, MongoDB, Firebase

Tools: Git, VS Code, NPM.

EDUCATION

University of Benin
OD - Doctor of Optometry
DECEMBER 2018.

PERSONAL PROJECT

TWEETER

This is a challenge from [Devchallenges](https://devchallenges.com). It is a social media app which I implemented using Next JS. Next Auth was used to handle authentication. React Query for managing server state and caching of api request. I used strapi to provide a decoupled backend for the frontend.
